

Having A Problem With Showers Plugging?

We have the valuable solution for you at a price that can be covered by your maintenance budget.

With the introduction of our new **Blue Ridge™ brush needle nozzle** we can provide components to convert your existing CVN shower into a Reliable automated brush shower that can allow you to clean the nozzles more consistently and safely.

Our Reliable Automated Brush Rotation System is designed not only to clean the nozzle tips, but also the entire inner diameter of the shower pipe within the range of the nozzle area. By automating this operation, the nozzles tend to consistently stay clean and require less maintenance.

Contact us for more information on this product.

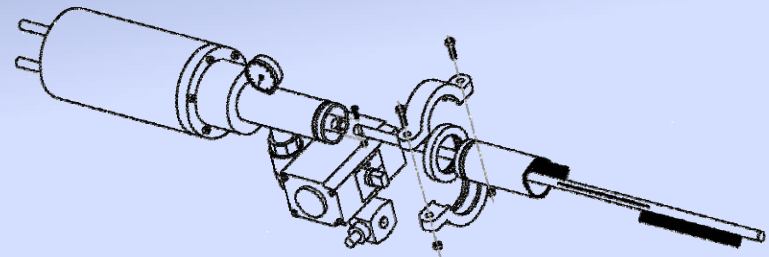

** A manually operated brush system with handwheel or ratchet is also available.

What will you do?

*Nozzle in Former Nash-CVN
Systems Shower
(Nozzle is on the outside)*

Upgrade To This:

*Blue Ridge™
(Nozzle is on the inside)*
