

Are Suspended Solids & High Water Temperatures Costing You Money

- Are you WASTING ENERGY by adding horsepower to maintain vacuum levels due to hot seal water?
- Is BUILD UP in your vacuum pumps causing pump rebuilds to be an annual issue?

ADDING a CVN Vooner Osprey™ Gravity Strainer with a Cooling Tower to your water system can remove these Pains & Costs

- STOP using fresh water when process water is available.
- STOP sending process water to the sewer when it can be reused.
